MULTIFUNCTION MANUAL SLIDING DOOR SYSTEM

MUTO COMFORT

Featuring self-closing action, DORMOTION damping mechanism, and telescopic sliders
Introducing MUTO Comfort, a new manual sliding door system from DORMA. MUTO’s deceptively simple, clean design conceals a range of optional features that enhance ease of operation and convenience.

- Self-closing action
- DORMOTION damping mechanism (DORMA SoftClose®)
- Door position status indicator

Versatile MUTO Comfort delivers multifaceted solutions:

- Suitable for glass, wood, and other types of door applications
- Supports doors weighing up to 330 lb (150 kg)
- Easily installed and adjusted, with a removable front cover
- Unparalleled design in multiple finishes; choose from aluminum, similar to satin stainless, or over 200 custom RAL colors
- Single or double panel, synchro, self-closing, and telescopic models
Easy installation
Simple handling
Precise installation

COMING SOON
MUTO Basic Manual Sliding Door System

A simple, elegant sliding door system designed for wood doors weighing up to 440 lb (200 kg)
Extraordinary convenience housed in a slim profile

The MUTO Comfort system impresses by virtue of its compact elegance and extensive functionality, creating a sliding door system with enhanced user-friendliness.

Even tailored solutions come easily

The fully integrated MUTO Comfort offers a choice of models and optional functions, all controlled by mechanisms housed out of sight behind the compact header. The XL 120 Self-Closing model offers the convenience of power-free self closing.

Optional convenience feature

A convenient option is the MUTO status indicator, which allows the door to be monitored from anywhere in the building.

Glass, wood, or metal applications

MUTO Comfort is particularly suitable for glass applications, but can be adapted for wood, metal, or other door material solutions.

Self-closing. Hassle-free.

The MUTO Comfort XL 120 Self-Closing model automatically closes the door once it has been opened; the quiet action operates without a power supply – an enhancement to any interior.

DORMOTION – the elegant DORMA Softclose® damping mechanism.

The epitome of elegant convenience, the optional DORMOTION function gently decelerates the door panel over the last few inches, taking it automatically and quietly to its end opened or closed position.

Status indicator – everything under control.

The optional status indicator ensures that the sliding door can be monitored with remarkable ease. As soon as the door opens or closes, a status signal is transmitted to the building management system or an indicator lamp – an important benefit in buildings requiring professional facility management capability.
COMPACT CONSTRUCTION, ELEGANT FUNCTIONALITY

MUTO – multiple design options.

Sophisticated technology enclosed in compact header

MUTO systems conceal complex technology within a compact header case, a clever design that allows MUTO to match and enhance any project’s décor. The removable logo clip and the choice of finishes are characteristic of DORMA’s integrated approach to design.

Multiple models and configurations to choose from

- Single panel
- Double panel with Synchro. The second door panel opens and closes automatically as the first one moves. (Not available with DORMOTION.)
- Double panel without Synchro. The two panels open and close independently of each other.
- Telescopic. For single or bi-directional panels where space is limited at either or both ends of door travel (Available 2016).

DORMA quality

The DORMA logo clip on the MUTO header is a marker of DORMA quality. If preferred, the logo clip can be easily removed.

Color scheme

For that extra bit of individuality. The aluminium MUTO profile can be provided in 150 Satin Aluminum or 113 Similar to Satin Stainless. Special powder-coated finishes are also available upon request.

- 150 Satin Aluminum
- 113 Similar to Satin Stainless (Available 2016)

Refer to the MUTO Comfort publication #07000475 for details regarding the Comfort models and configurations described in this brochure.
VERSATILE MUTO COMFORT FOR GLASS AND WOOD MANUAL SLIDING DOORS

Optional user-friendly features customize MUTO Comfort for individualized solutions

A multifunction sliding door system, adaptable to changing needs

User-friendly MUTO Comfort options enable customized solutions with the door mechanisms concealed behind a compact header. Not certain what features you need? No problem. Practical assembly kits allow options to be retrofitted as your needs change. MUTO Comfort supports doors weighing up to 330 lb (150 kg).

MUTO Comfort options

- Door position status indicator connecting to your facility management
- DORMOTION (DORMA SoftClose®) damping mechanism; no glass preparation required

TLG-tested. Transparent safety. MUTO has been successfully tested to assure its safety when installed with tempered laminated glass (TLG) using DORMA’s clamp & glue technology.

Simple precision
Drop/suspended ceilings? No problem. The interconnecting profile means that the system can still be installed with precision.
THE FAST AND EASY TO INSTALL
MANUAL SLIDING DOOR SYSTEM

MUTO – the new standard for quick and hassle-free installation from DORMA

- Quick & hassle-free fitting and adjustment from the front.
- Suitable for use with TLG (tempered laminated safety glass)
- Prepared for both glass and wood door applications
- Adapter profile for drop/suspended ceiling installation
- Installing the MUTO manual sliding door system is easy; all the relevant functions can be set from the front. Height adjustment is remarkably simple, and no additional glass preparation is needed to incorporate the DORMOTION damping function.
- Even drop/suspended ceilings are not a problem, thanks to the adapter profile provided. MUTO systems installed with tempered laminated glass have undergone testing that assures them to be extra safe.
- Mounting options. MUTO Comfort systems can be wall, ceiling, or glass mounted.

DORMOTION starter
Mounted on the track rail and secured by a clamping screw.

DORMOTION (DORMA SoftClose®)
The damping mechanism is simply mounted on the door panel and clamped tight.

Anti-jump mechanism
Simple activation of the anti-jump mechanism.

Clip-on mounting
To fit the cover profile, simply twist the clip-on mounting into the track rail, then clip the cover profile on from below.

End stops
Clamp fit enables the end stops to be installed and adjusted with ease.

Height adjustment
Door panel height adjustment of up to +/- 3/16" (5 mm) possible at any time. Simply undo the fixing screws and turn the adjustment setscrew in the appropriate direction. (Adjustment may vary by MUTO Model.)
