Accordion Doors & Partitions

SOUNDMASTER® / MODERNFOLD

Accordion Doors and Partitions from Modernfold.

When you need to get the most from your space.

Accordion doors and partitions from Modernfold are designed to provide quick and easy space division with moderate sound attenuation and a pleasing visual appearance.

All Modernfold accordion doors and partitions provide quick sight and sound division with a simple pull-and-latch

operation. Electric operation is also available. Accordion doors and partitions are available as single and paired openings. For optimal design flexibility, curved track allows the partition to move around corners. Modernfold offers a large selection of standard finishes.

Since Modernfold's inception, building owners, facility managers, architects, interior designers, and contractors have come to recognize the Modernfold name—a name synonymous with flexible space design, quality products, professional installation, and ongoing product support.

Soundmaster®

For versatility and durability, Modernfold's Soundmaster offers a broad range of vinyl, carpet, and fabric choices to complement any room decor. Its steel sound liner and three-ply top and bottom sweeps provide moderate speech privacy.

Modernfold®

Modernfold accordion doors and partitions are the industry standard. With their durability, replaceable outer

coverings and easy operation, they are designed to give you many years of easy and trouble free operation.

Soundmaster accordion partitions are ideal for dividing space economically when moderate sound attenuation is desired.

Soundmaster accordion partitions are ideal for applications in church classrooms, fellowship halls, clinics, restaurants, and many other applications. Behind its fabric outer covering, Soundmaster has steel paneled sound liners to provide moderate sound attenuation and increased durability. Optional electric

operation makes large, even curved openings as easy as turning a key. When both durability and moderate noise reduction are important, Soundmaster partitions are the answer.

Acoustical Performance—up to 40 STC is provided with Soundmaster's steel panel and

membrane liners. Three-ply top and bottom sweeps assure a positive seal. Long term strength and durability is made possible by Soundmaster's patented, three-dimensional welded steel frame and heavy duty construction.

1 Easily replaceable
Class A rated coverings

2 Continuous horizontal
pantograph hinges

3 Three-dimensional
welded steel frame

4 Ball-bearing trolleys
with high tensile
yokes

5 Three-ply top and
bottom sweep seals

6 Steel sound liner

The Modernfold accordion is ideal for basic sight and space separation.

When strength and durability are important and only sight division is required, Modernfold accordion doors and partitions are the answer. Modernfold partitions feature a durable steel

frame construction, ball bearing trolleys, and a wide choice of finish options. The heavy, all steel frame and hinging, which supports the finish, takes a lot of abuse, yet its weight requires

only minimal support. In addition to simple, straight "wall-to-wall" runs, Modernfold accordion partitions can be curved or even serpentine to meet your exact needs.

- 1** Easily replaceable Class A rated coverings
- 2** Continuous horizontal pantograph hinges
- 3** Three-dimensional welded steel frame
- 4** Ball-bearing trolleys with high tensile yokes

Accordion Door/Partitions Selector Guide

* Per lineal foot of opening width, plus posts
** Paired partitions double maximum width
