Acousti-Seal® Encore®: Pinnacle of Performance

Modernfold's Acousti-Seal® Encore® will defy expectations. Engineered to bring science, industry, and art together, it is the pinnacle of operable walls. Where others still aspire, Acousti-Seal® Encore® offers an unmatched, industry-leading level of sound control at 56 STC.

Every aspect of the Acousti-Seal® Encore® design was engineered to perform and protect the acoustical barrier. No sacrifices are required when customizing to fit design preferences or structural requirements. Encore®'s panels stand stoically - sealed to end walls, to one another, to even panels with egress – thanks to Modernfold's unsurpassed and patented seal technology.

The Acousti-Seal® Encore® Product Portfolio

The sheer performance power of Acousti-Seal® Encore® makes it ideal for projects of scale. Showcased in some of the largest convention centers around the world, Encore® makes the monumental manageable.

Acousti-Seal® Legacy® Fire Rated

Acousti-Seal® Legacy® Fire Rated system is available in single or paired configurations. It provides the extra safety precautions some buildings require with a one-hour fire rating tested at Underwriters Laboratories (UL®).

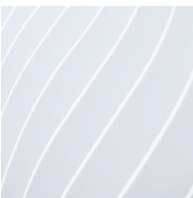

Acousti-Seal® Premier®: Designer's Dream

Acousti-Seal® Premier® is the ultimate in design flexibility offering a truly custom appearance. Premier® is the perfect choice to match existing construction or reflect a true, individualized look thanks to its wide variety of finish, layout, and egress options. Bring your vision to life with this highly customizable product.

The Acousti-Seal® Premier® Product Portfolio

A truly customizable product, Premier® excels at creating a statement wall or artfully blending in to match existing construction.

The Acousti-Seal® Configurations

All Acousti-Seal® product lines are available in three unique configurations to best match the visual and performance needs of your design. Let Acousti-Seal® resolve any challenge with one of the following constructions:

Single Panel System

Acousti-Seal® single panel system uses simplicity to cure complexity. It is the best choice on the market for large openings and complex layouts. Our single panel system can scale high ceiling requirements and provide a multitude of room setups. Design options are the most robust with a single panel system including egresses and hardware.

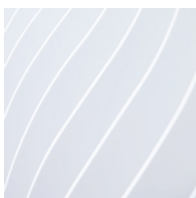

Paired Panel System

Acousti-Seal® paired panel system provides the ultimate in ease and flexibility. Quick setup is possible with paired panel operable walls, as panels are hinged together in groups of two and move smoothly in a straight line. Requiring no auxiliary storage track or support and using automatic bottom seals, paired panel operable partition systems are suited for applications that require exceptional durability, acoustic control, and frequent efficient use.

Continuously Hinged System

Acousti-Seal® continuously hinged panel system provide effortless setup with fully-automated electrical operation and state-of-the-art safety systems. Our unitized steel construction, operable top and bottom seals, and custom finish options leave Modernfold's continuously-hinged operable walls and partitions the leader in the industry.

Presto® Package: Peace of Mind

Ushering in the future, the Presto® Package brings confidence and class to your next project. With the use of a sleek, password-protected touchpad, a single operator can activate a wall and walk away with true peace of mind.

Modernfold's state-of-the-art, premium safety features are standard with the Presto® Package including motion monitoring, obstruction detection, pressure sensitive floor mats, and pressure sensing edges. The Presto® Package can be safely installed and operated in conjunction with any Acousti-Seal® continuously hinged movable wall system.

Let the Presto® Package elevate your commitment to end users' safety, time management, and allocation of resources.

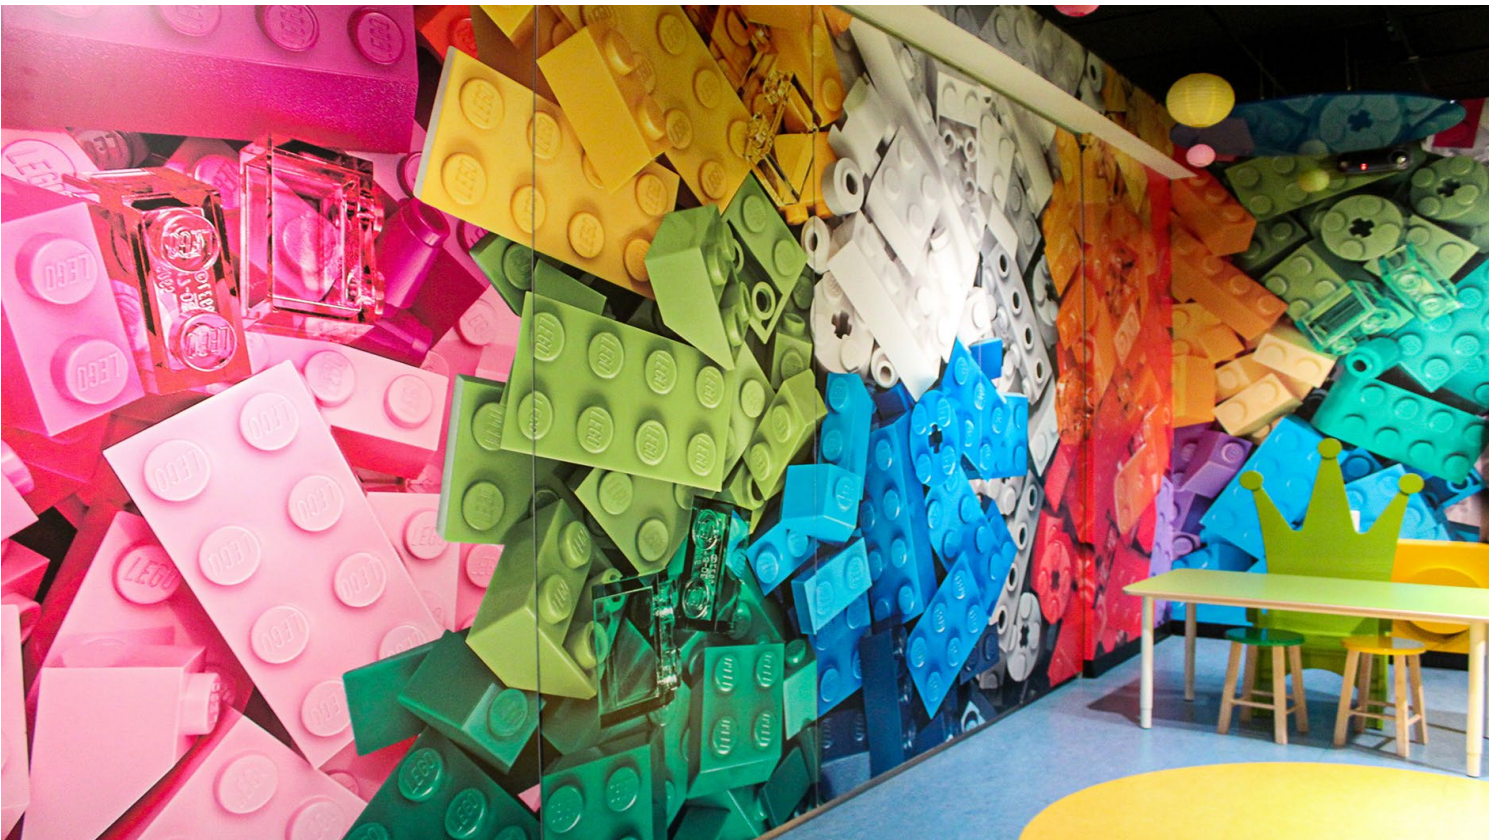

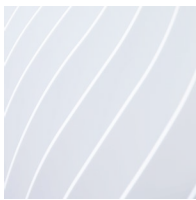

Finishes

Times have changed. The expansive portfolio of Acousti-Seal®'s design options retires outdated misconceptions about operable walls and bring fresh, exciting design strategies centerstage. Today, Modernfold welcomes the challenge to exceed your design aspirations.

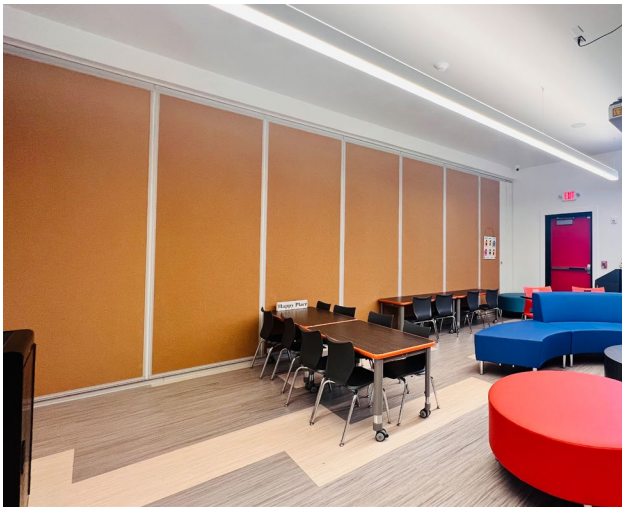

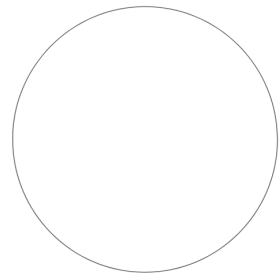

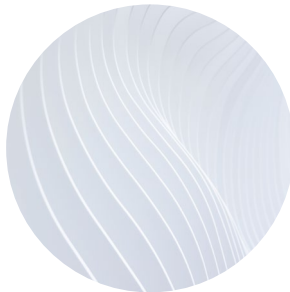

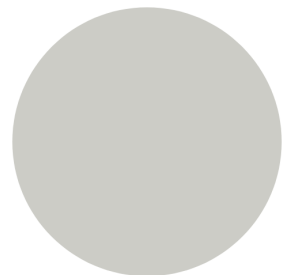

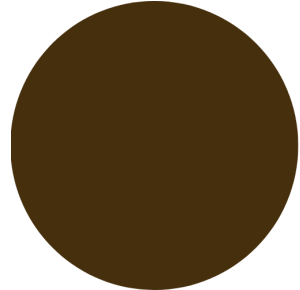

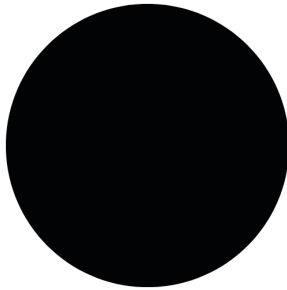

With an array of quality partnerships and a level of customization unmatched in the market, covering options include Carnegie fabric, Maharam fabric, Len-Tex vinyl, Wilsonart laminate, Shaw carpet, and the option for customer's own material to be applied or left uncovered for field finishing.

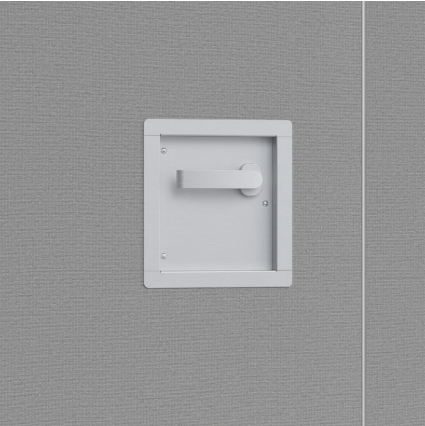

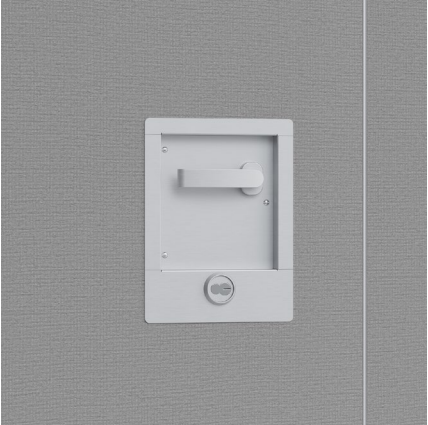

Sherwin Williams panel trim options further allow your aesthetic to be matched offering Dark Bronze, Smoke Gray, Natural Choice, and Black. White is available for hinges only.

Increase your operable wall's value by incorporating a custom work surface. Ideal for end users, Modernfold offers dry erase markerboard or natural cork tackboard in full or partial coverings.

Hardware

State of the art hardware will further refine your design with options including hand pulls with push plates, lever handles on both sides of the door, panic hardware, automatic door closers, foot bolts, and self-illuminating exit signs – recess or surface mounted.

Pass Doors

Single or double pass door options make flow and egress a seamless design element. All doors are designed to fully incorporate the aesthetic of the matching walls.

Pocket doors also offer matching construction design options to blend into the exterior walls of any room and conveniently store panels when not in use.

SmartTrack™: Effortless Set Up

Modernfold takes pride in offering high-performance, long-lasting suspension systems.

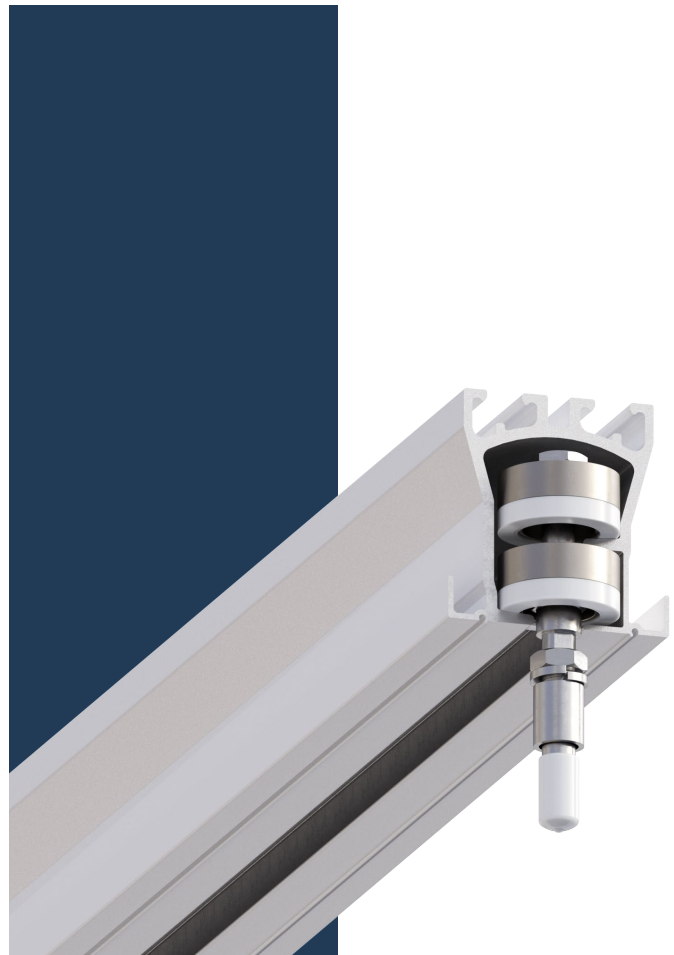

Modernfold's SmartTrack™ technology has transformed traditional track and trolley systems. Our #17 and #14 track systems utilize SmartTrack™ programmable track to feed panels to a variety of selected and customized layouts. Using predetermined carriers along the track, panels manually move as the track directs, putting themselves in the correct position and offering error-free set up.

With quiet and durable operation, our #17 and #14 SmartTrack™ tracks runs on an all-steel suspension system. Both options provide you with a durable steel suspension, easy operation, and worry free maintenance with industry leading warranties.

Multi-Directional Systems

The RT200 and RT100 right angle suspension systems provide an alternative where grid layouts are a must. Right angle track systems allow the user to set up and arrange the partitions in numerous configurations.

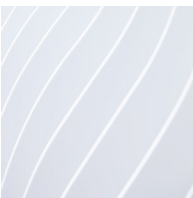

Accordion Doors

For over a century, accordion doors from Modernfold have successfully provided separated sight and sound space division with the pull of a handle. With a century of innovation behind us, Modernfold is proud to still offer the product where our journey first began.

Soundmaster®

Offering moderate sound separation up to 40 STC, the Soundmaster® accordion door is a convenient and durable option ideal for religious, educational, healthcare, and other venues. Behind its fabric, vinyl, or carpet covering, Soundmaster® has steel paneled sound liners and our patented, three-dimensional welded steel frame. For added convenience, optional electric operation makes dividing large, even curved openings as easy as turning a key.

Modernfold®

Our namesake product, Modernfold®, is the industry standard for quality accordion room dividers. It's the clear choice when strength and durability are important and only sight division is required. Modernfold® partitions feature a durable steel frame construction and a wide choice of finish options. Even with an all-steel frame and hinging, its weight requires only minimal support. In addition to simple, straight "wall-to-wall" runs, Modernfold accordion partition walls can be curved or even serpentine to meet your exact needs.
